joseph-reilly.vercel.app • newdawnrevops.com

AI Automation Engineer with 7+ years of experience building high-traffic web applications and autonomous AI systems using Python, TypeScript, React, and Next.js. Specializes in architecting multi-agent workflows, integrating LLMs with enterprise CRMs (HubSpot), and building deterministic tool-use pipelines with the Model Context Protocol (MCP) and Google Agent Development Kit (ADK). Proven track record of replacing rigid, rule-based business workflows with scalable, production-grade AI solutions that drive measurable business value.

TECHNICAL SKILLS

AI & Agentic Systems:	Multi-Agent Orchestration, Google Agent Development Kit (ADK), Model Context Protocol (MCP), Zapier MCP, Human-in-the-Loop (HITL) Governance, Structured Outputs (Pydantic), Prompt Engineering, Conversational AI
Languages & Frontend:	Python 3.12, TypeScript, JavaScript (ES6+), SQL, React (18/19), Next.js (15/16), Vite, Astro, HTML5, CSS3, Tailwind CSS
Backend, Data & Cloud:	FastAPI, Node.js, Express, Google Cloud Firestore, Firebase Auth, PostgreSQL, SQLite, MongoDB, Google Cloud Run, Docker, AWS Core Services, Resend, REST APIs, Git
CRM & RevOps:	HubSpot CRM API, Automated Portal Health Auditing, Algorithmic Lead Scoring, Firmographic Enrichment, Predictive Revenue Forecasting, Custom CMS Modules

AI & SOFTWARE ENGINEERING PROJECTS

New Dawn RevOps — Multi-Agent RevOps & CRM Platform (Founder & Sole Engineer) newdawnrevops.com

Python 3.12, FastAPI, Google ADK, Next.js 15, React, TypeScript, Vite, Cloud Firestore, Firebase Auth, Zapier MCP, SQLite, Google Cloud Run, Docker, Resend

- **3-Tier Monorepo Architecture:** Engineered a complete B2B AI agency platform uniting a Next.js 15 client storefront and interactive qualification chatbot (public-web), a React/Vite internal staff cockpit (operator-dashboard), and a Python 3.12/FastAPI multi-agent orchestration backend (agent-engine), all deployed to Google Cloud Run.
- **Supervisor Orchestration:** Architected a central "Agency Director" supervisor agent with Google ADK that decomposes complex tasks and routes execution across 10 specialized departmental sub-agents.
- **10-Department Autonomous Execution:** Built departments covering HubSpot CRM syncing, instant portal health audits, CRM cleanup and deduplication, algorithmic lead scoring, firmographic enrichment, predictive revenue forecasting, copywriting/SEO, and CMS publishing.
- **CRM & Tool Integration:** Integrated deeply with the HubSpot CRM API and Zapier MCP (Slack, Gmail, Google Calendar, Sheets) to replace rigid rule-based workflows with dynamic AI reasoning.
- **Human-in-the-Loop (HITL) Governance:** Built a Firebase-authenticated operator dashboard featuring multi-session Agency Director chat, real-time audit logs, agency KPI metrics, and mandatory human approval gates before agents execute email drafts, CRM mutations, or CMS publishing.

Modern UI Component Library — Next.js 16 & React 19 Design System component-library-714302763548.us-central1.run.app

Next.js 16, React 19, TypeScript, Tailwind CSS, Google Cloud Run

- Engineered a customizable, accessible UI component library and template showcase with Next.js 16 and React 19 primitives to accelerate responsive full-stack web application delivery.

PROFESSIONAL EXPERIENCE

Domestique — Web Developer February 2024 – Present

- Architected a reusable UI component library using React and Tailwind CSS, standardizing frontend architecture.

Clever Marketing — Web Developer April 2023 – Present

- Developed and maintained full-stack websites, custom CRM integrations, and e-commerce platforms using HubSpot, Shopify, and WordPress.
- Implemented technical SEO strategies and performance tracking tools to analyze user behavior, increasing organic traffic by 30% and improving search rankings across 10+ client websites.
- Designed and launched cross-platform, mobile-first web applications in collaboration with cross-functional engineering, design, and marketing teams.
- Utilized modern design systems and performance monitoring tools to optimize page load speeds, user retention, and conversion pathways.

Revenue River Marketing — Frontend Developer December 2019 – February 2023

- Designed and developed customizable, responsive websites, reusable custom modules, landing pages, and email templates on the HubSpot CMS platform.
- Managed the HubSpot Marketplace portfolio, overseeing all domestic and international template sales while leading technical client onboarding and platform training.
- Streamlined front-end development workflows by establishing modular template standards across client engineering projects.

Trilogy Education — Teacher's Assistant (Coding Bootcamp) December 2019 – June 2020

- Trained bootcamp students in full-stack web development fundamentals (HTML5, CSS3, JavaScript, Node.js, React.js, Git, and Agile methodologies).
- Led technical code reviews, debugging sessions, and 1-on-1 engineering mentorship to prepare students for software development careers.

EDUCATION

Flatiron School (Denver, CO) — Software Engineering Immersive Program June 2019

Full-stack software engineering curriculum covering JavaScript, React, Ruby on Rails, SQL & database design, REST APIs, Git version control, testing, and debugging.

Kingsborough College (Brooklyn, NY) — Associate's Degree in Broadcast Journalism

Brooklyn College (Brooklyn, NY) — Completed Coursework in Broadcasting

TECHNICAL CERTIFICATIONS

- AWS Core Services
- Integrating With HubSpot I: Foundations
- HubSpot CMS for Developers I & II: Best Practices
- HubSpot CMS Implementation
- Software Engineering (Flatiron Curriculum)
- HubSpot CMS for Marketers
